STATEMENT

In 2021, I developed the musical instrument "Crescente", in the context of the research of the Master's Degree I attended, specializing in Sound Design and Interactive Music. I am currently enthusiastic about building new expressive musical instruments and consolidating programming skills for this purpose. At the same time, I'm often involved in musical projects, such as StopEstra! and the "Grupo Operário do Ruído" created by Sonoscopia. I have always kept an interest and a close relationship with music, working with the creative tools of sound also in the area of theater and performance.

SKILLS

- . Musical Improvisation;
- . Sound recording, editing and mixing;
- . Sound Synthesis with software and hardware tools;
- . Directing and managing artistic projects;
- . Soldering for small electronics: circuit boards, cables, sensors;
- . Photography and video editing + post-production;
- . Archiving and organizing media files;
- . Pure Data patching;
